Taras Petrivskyi

Senior Software Engineer / Front-End Lead

(JavaScript/TypeScript + ReactJS)

Purpose

To join a company that offers me an opportunity within the IT industry and enables me to become a professional in my field allowing me to achieve success for the company.

Personal information

➢ Address: Kyiv
➢ Mobile phone: +38 096 916 42 58
➢ E-mail: petrivskytaras02@gmail.com

Work experience

1. **Oct. 2025 - till now "Family Budget Pro" - https://familybudget.pro**
   - ✓ Founder and Full-stack Developer
2. **Feb. 2023 - till now "Radency" (the project was closed)**
   - ✓ Senior Software Engineer/Full Stack Software Engineer
3. **Feb. 2020 - Jan 2023 "Infopulse" (the project was closed)**
   - ✓ Senior Software Engineer (Web Solutions).
   - ✓ Front-End Lead/Senior Software Engineer (part-time project)
4. **Jul. 2020 - Aug 2021 "K2Fly (prev Sateva)" - during free time**
   - ✓ Senior Software Engineer / Front-End Tech Lead.
5. **Oct. 2018 - Feb. 2020 "Ciklum"**
   - ✓ Senior JavaScript Developer.
6. **Jul. 2017 – Oct. 2018 "GlobalLogic"**
   - ✓ Middle JavaScript Developer.
7. **Dec. 2015 – Jul. 2017 "Terrasoft"**
   - ✓ Junior/Middle Javascript/C# Developer.
8. **Jan. 2015 – Dec. 2015 LLC "Modern Telecom Engineering"**
   - ✓ Junior Frontend developer.

Commercial projects

Family Budget Pro

Founder and Software Engineer

https://familybudget.pro

Key contributions:

- Built and launched a full-stack SaaS product from scratch, owning the entire development lifecycle

- Designed and implemented scalable backend architecture (PostgreSQL, Prisma, API layer)
- Implemented authentication system (NextAuth.js, Google OAuth, email/password with verification)
- Integrated subscription payments (WayForPay) and transactional email system (Resend)
- Set up production infrastructure (Vercel, Neon, Cloudflare) with CI/CD and domain configuration
- Developed responsive UI with custom components and data visualization (MUI, charts)
- Designed product architecture, database models, and core business logic
- Achieved 95+ Lighthouse performance score

Tech stack:
TypeScript, React, Next.js, NextAuth.js, PostgreSQL (Neon), Prisma, Resend, React Hook Form, MUI, TanStack Query

Tools & Platforms:
Vercel, Cloudflare, GitHub, WebStorm, Figma

Radency

Senior Software Engineer (Full Stack)

US marketplace for tokenized assets from scratch

Key contributions*:*

- Led frontend architecture and development of a marketplace from scratch
- Defined technical solutions, task planning, and development workflows
- Built and delivered core product features, improving scalability and maintainability
- Conducted code reviews and mentored developers
- Contributed to backend services (Node.js, Kotlin, Express)

Tech stack*:*
TypeScript, React, Next.js, React Hook Form, Jest + React Testing Library, Material-UI, GraphQL/Apollo, TanStack Query (FKA React Query), Chart.js, Redash, Kotlin, Express.js

Tools*:*
GitLab, WebStorm, GIT, Jira, Figma

Infopulse:

Senior Software Engineer (Web Solutions)

Key contributions*:*

- Conducted technical interviews and contributed to team hiring decisions
- Delivered scalable web and mobile applications used in production environments
- Improved UX/UI through proactive feature and product enhancements
- Applied TDD practices to ensure code quality and reliability
- Built cross-browser support applications and optimized production builds

Tech stack*:*
JavaScript/TypeScript, React, MobX, NodeJS, Webpack, Jest, Docker, React Native

Tools:
Azure DevOps, WebStorm, GIT, Jira, Xcode

Project (part-time) - Frontend Team Lead (part-time)

Key contributions:
- Led frontend team, owning planning, estimation, and delivery
- Mentored developers and conducted code reviews
- Delivered new features and improved development processes

Tech stack:
JavaScript/TypeScript, React, Redux, Redux Form, Jest + React Testing Library, Material-UI, Highcharts

Tools:
Azure DevOps, WebStorm, GIT, Jira, Zeplin

K2Fly (Sateva):

Senior Software Engineer / Front-End Tech Lead

Enterprise model management platform

Key contributions:
- Led frontend architecture and development from scratch for an enterprise-grade platform
- Defined technical direction, architecture decisions, and development standards
- Mentored developers and conducted code reviews
- Implemented complex state management (Redux, Redux-Saga) for scalable data flows
- Applied TDD practices to ensure code quality and reliability

Tech stack:
TypeScript, React, Redux, Redux-Saga, Webpack, Jest, Material-UI, react-awesome-query-builder

Tools:
WebStorm, GIT, Jira, Bitbucket

Ciklum:

Senior JavaScript Developer

Risk management platform

Key contributions:
- Improved application performance through refactoring and code optimization
- Participated in frontend architecture planning and feature development
- Implemented cross-browser support and optimized production builds (Webpack)
- Applied TDD practices and ensured code quality via testing and code reviews
- Maintained CI/CD processes using Azure DevOps

Tech stack:
JavaScript, React, Redux, styled-components, NodeJS, Webpack, Jest

Tools:
Azure, Azure DevOps, WebStorm, Jira

GlobalLogic:

Middle JavaScript Developer

Avid Technology

Key contributions:

- Developed and maintained reusable component libraries for third-party developers
- Built and supported backend services using Node.js
- Contributed to CI/CD processes (GitLab, Docker) and production builds (Webpack)
- Mentored junior developers and supported cross-team collaboration

Tech stack:

JavaScript, React, Redux, SCSS, NodeJS, Webpack

Tools:

IntelliJ IDEA, Jenkins, GitLab, Jira, Docker, Kubernetes

Terrasoft:

Junior/Middle Javascript/C# Developer

Enterprise CRM platform (marketing, sales, service)

Key contributions:

- Contributed to development of a large-scale CRM system
- Implemented frontend features using MVVM architecture (ExtJS)
- Worked with legacy codebase, performing refactoring and feature enhancements
- Developed and maintained backend components using C#/.NET
- Wrote unit and acceptance tests to ensure code quality
- Supported CI processes and participated in code reviews

Tech stack:

JavaScript, ExtJS, RequireJS, BackboneJS, C#, .NET, MSSQL, Oracle, CSS, LESS, JSON, NodeJS

Tools:

WebStorm, Microsoft Visual Studio, SVN, JIRA

Modern Telecom Engineering:

Junior Frontend Developer

Internal web applications for telecom company (CRM/ERP systems)

Key contributions:

- Developed responsive web interfaces and SPA functionality
- Contributed to internal CRM/ERP frontend development
- Implemented UI features using JavaScript and jQuery

Tech stack:

JavaScript, HTML5, CSS3, jQuery, Bootstrap, PHP

Skills set

➢ **Core stack -** JavaScript (ES5, 6+), TypeScript, React, Next.js, HTML/CSS

(LESS, SCSS)

- **State Management & Data Fetching -** Redux/Redux Toolkit, Redux Saga, MobX, Zustand, GraphQL/Apollo, TanStack Query
- **UI & Libraries -** Material UI (MUI), Tailwind CSS, Highcharts, Chart.js, TanStack React Table, React Hook Form, Redux Form, Monaco Editor, React Markdown, Storybook, React-Awesome-Query-Builder
- **Testing -** Jest, React Testing Library (unit & component testing)
- **Backend & Databases -** Node.js, MSSQL, MySQL, Redash
- **Tooling & DevOps -** Webpack, Vite, GIT, Docker, NX, JIRA, JetBrains WebStorm/IntelliJ IDEA, Cursor, Bpm'online, GitHub/GitLab/Bitbucket, Azure DevOps, Microsoft Visual Studio
- **Additional Experience -** React Native, AI-assisted development (Cursor, Claude, Gemini, ChatGPT/Codex)

Education

✓ In 2014 I finished programming course: "Frontend development". The learning center.
✓ 2009 Bachelor's degree at the Ternopil Ivan Pul'uj National Technical University specialty: "Automated Control of Technological Processes".

Languages

✓ Ukrainian – native speaker
✓ English – upper intermediate
