TARAS PETRIVSKYI

SENIOR FULL-STACK SOFTWARE ENGINEER | TECHNICAL LEAD

Kyiv, Ukraine | Phone: +380 96 916 42 58 | Email: petrivskytaras02@gmail.com
linkedin.com | FamilyBudget.pro

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and Technical Lead with 11+ years of experience building production web applications, including 9+ years with React. Combines strong frontend engineering and architecture skills with hands-on backend development using Node.js, Express.js, REST APIs, PostgreSQL and Prisma. Experienced in taking products from early architecture through implementation, testing, deployment and ongoing improvement. Built and launched FamilyBudget.pro, an independent SaaS product, owning its application architecture, database, authentication, subscription payments and production infrastructure. Also experienced in technical leadership, mentoring, code reviews and cross-functional delivery.

TECHNICAL SKILLS

Programming languages: TypeScript, JavaScript (ES6+), C#, HTML5, CSS3

Frontend Development: React, Next.js, React Router, React Hook Form, Material UI (MUI), Tailwind CSS, Storybook, TanStack Table

Backend Development: Node.js, Express.js, Kotlin, RESTful APIs, GraphQL, Apollo, NextAuth.js, Authentication, API design, middleware

Databases & ORM: PostgreSQL, Prisma ORM, MSSQL, MySQL

State Management & Data Fetching: Zustand, Redux, Redux Toolkit, Redux-Saga, MobX, TanStack Query

Testing & Quality Assurance: Jest, React Testing Library, unit and component testing, TDD, code reviews

Cloud, DevOps & Infrastructure: AWS, Vercel, Neon, Cloudflare, Docker, Kubernetes, Jenkins, Webpack, Vite, CI/CD, GitHub, GitLab, Azure DevOps, Jira, Figma

AI & Integrations: OpenAI API, Anthropic, Google Gemini, streaming AI responses, AI-assisted development tools

PROFESSIONAL EXPERIENCE

Gemicle | Senior Full-Stack Software Engineer | *Jan 2026 – Present*

Early-stage startup

- Architect and build a full-stack application from scratch, owning technical decisions across frontend and backend.
- Design frontend architecture, including application state management with Zustand, data flow and a reusable component system documented in Storybook.
- Develop backend services with Node.js and Express.js, implementing routes, middleware and business logic layers.
- Integrate OpenAI, Anthropic and Google Gemini models, including streaming responses and conversational experiences across client and server.
- Build real-time AI chat interfaces with token streaming and message history.
- Collaborate with design and product stakeholders to translate Figma specifications into production-ready functionality; contribute through code reviews and engineering standards.

Stack: TypeScript, React, React Router, TanStack Query, Zustand, Node.js, Express.js, Storybook, AWS, OpenAI, Anthropic, Gemini

FamilyBudget.pro | Founder & Full-Stack Software Engineer | *Oct 2025 – Present*

Independent personal and family finance SaaS | https://familybudget.pro

- Conceived, architected, built and launched a full-stack SaaS product, owning the complete product and engineering lifecycle from database design to production operations.
- Designed the backend architecture, PostgreSQL data model and API layer using Prisma ORM and Neon.
- Implemented authentication with NextAuth.js, Google OAuth, email/password credentials and email verification.
- Integrated subscription billing with WayForPay and transactional email delivery with Resend.
- Built core product workflows for expense and income tracking, budgets, savings goals, recurring transactions and shared budgets.
- Implemented AI-assisted transaction entry and product features using external AI APIs.
- Developed responsive interfaces and analytics dashboards with React, Next.js, MUI and charting components.
- Configured production deployment and infrastructure with Vercel, Cloudflare and Neon; achieved a 95+ Lighthouse performance score.

Stack: TypeScript, React, Next.js, NextAuth.js, Node.js, PostgreSQL, Prisma, TanStack Query, MUI, React Hook Form, Resend, WayForPay, Vercel, Neon, Cloudflare

Radency | **Senior Software Engineer / Full-Stack Engineer** | *Feb 2023 – Apr 2026 (Contract: Jan-Apr 2026)*

US marketplace for tokenized assets, built from scratch

- Led frontend architecture and development for a marketplace product, contributing to technical decisions, planning and delivery workflows.
- Designed and delivered core product features with an emphasis on scalability and maintainability.
- Contributed to backend services and integrations using Node.js, Express.js and Kotlin.
- Conducted code reviews, mentored developers and supported engineering quality practices.

Stack: TypeScript, React, Next.js, Node.js, Express.js, Kotlin, GraphQL, Apollo, TanStack Query, Jest, React Testing Library, MUI, Chart.js

Infopulse | **Senior Software Engineer; Front-End Lead (part-time project)** | *Feb 2020 – Jan 2023*

- Delivered and maintained production web and mobile applications, contributing to architecture, implementation and product improvements.
- Led a frontend team on a part-time project, owning planning, estimation, delivery, mentoring and code reviews.
- Participated in technical interviews and hiring decisions; applied TDD and improved cross-browser support and production build quality.

Stack: JavaScript, TypeScript, React, React Native, Node.js, MobX, Redux, Jest, React Testing Library, Webpack, Docker

K2Fly (formerly Sateva) | **Senior Software Engineer / Front-End Tech Lead** | *Jul 2020 – Aug 2021*

Enterprise model management platform | Part-time contract

- Led frontend architecture and implementation from scratch, defining technical direction, development standards and architecture decisions.
- Mentored developers, conducted code reviews and implemented scalable state management and test practices.

Stack: TypeScript, React, Redux, Redux-Saga, Webpack, Jest, Material UI

Ciklum | **Senior JavaScript Developer** | *Oct 2018 – Feb 2020*

Risk management platform

- Improved application performance through refactoring and code optimization; contributed to architecture planning and feature delivery.
- Implemented cross-browser support, optimized Webpack production builds and maintained CI/CD workflows in Azure DevOps.
- Applied TDD, testing and code reviews to maintain code quality.

Stack: JavaScript, React, Redux, Node.js, styled-components, Webpack, Jest, Azure DevOps

GlobalLogic | **Middle JavaScript Developer** | *Jul 2017 – Oct 2018*

Avid Technology

- Developed reusable component libraries and supported backend services using Node.js.
- Contributed to CI/CD and production build processes; mentored junior developers and collaborated across teams.

Stack: JavaScript, React, Redux, Node.js, SCSS, Webpack, Docker, Kubernetes, GitLab, Jenkins

Terrasoft | **Junior / Middle JavaScript & C# Developer** | *Dec 2015 – Jul 2017*

Enterprise CRM platform

- Developed features for an enterprise CRM platform using frontend MVVM patterns and a legacy codebase.
- Built and maintained backend components with C#/.NET and worked with relational databases; wrote unit and acceptance tests.

Stack: JavaScript, ExtJS, RequireJS, Backbone.js, C#, .NET, MSSQL, Oracle, Node.js

Modern Telecom Engineering | **Junior Frontend Developer** | *Jan 2015 – Dec 2015*

Internal CRM/ERP web applications

- Developed responsive web interfaces and single-page application functionality using JavaScript, jQuery, HTML and CSS.

EDUCATION

Bachelor's Degree, Automated Control of Technological Processes | Ternopil Ivan Pul'uj National Technical University | 2009

Frontend Development Program | The Learning Center | 2014

LANGUAGES

Ukrainian: Native | English: Upper-Intermediate (B2)
